

Caring for your new bed

Don't bend or
roll your new mattress
if it was delivered flat

Air your new mattress
before use and on a
regular basis

Rotate your mattress
head to toe regularly
and flip it over unless
it's single sided

Give it time (around
30 nights) to get used
to your new mattress

Body impressions or
settlement forming in
the first few weeks is
perfectly normal

Gently vacuum the
top of the mattress
from time to time
